1. Connect the VE-2 to your computer via USB connection. Turn on the Ve-2, then press the [MEMORY] button on the pedal.

2. Press the [MEMORY] button to specify the destination memory (color) in which you want to save the settings.

3. When the [MEMORY] button blinks slowly, indicate the type of harmony you want to save.

4. When the [MEMORY] button blinks slowly, press the button to switch to the memory you want to save.

5. Specify the name and type of harmony as described in “The Harmony SELECTOR.”

6. While playing your guitar, vocalize into the mic.

7. Your vocalizations and audio output from the mic are mixed by your specified type of harmony.

When using a rechargeable battery and a charger, make sure to use only the combination of battery and charger that has been specified by the battery manufacturer. Also, be sure to read all of the precautions that were supplied with the rechargeable battery and charger, and abide by them when using the battery/charger.
